

Take control of your health. Feel Better. Change your life. Many others have done it. You can too!

Kent MacLeod, B. Sc. Pharm
Canada's 2009
Compounding
Pharmacist of the Year

For the past 30 years, the team at NutriChem has been helping people take control of their health.

NutriChem is a compounding pharmacy, laboratory and clinic that uses research, individual testing and education to provide people with science-based solutions to their health problems.

Over the last three decades, we've helped people with a wide range of health issues, including:

- Menopause
- Depression
- Hormonal imbalance
- Low energy
- Metabolic Syndrome
- Pain management
- Cancer

NutriChem is one of the world's leading authorities on the positive impact of nutrition on the biochemistry of individual diseases, and has received numerous awards for its innovation.

At NutriChem, you are never treated with a cookie cutter approach, nor are you given band aid solutions to your health problems. That's because everyone's health situation is different. We emphasize drug-free solutions and take a holistic approach to health.

Our compounding lab uses the highest quality pharmaceutical ingredients and follows Good Manufacturing Practices so you can be assured that what you are putting into your body is safe.

If you have a health problem, come see us at NutriChem. We've been helping others take control of their lives for over 30 years. We can help you too.

Stress, Mood and Hormones

– How to Nourish Your Body and Brain Naturally

with NutriChem's Award-Winning Clinical Pharmacist Kent MacLeod.

Presentation will be followed by a Q&A on bio-identical hormone therapy with gynaecologist Dr. Joyce Buckley, M.D.

Wednesday September 28, 2011 7:00 p.m.

**Saint Paul University's Amphitheatre
223 Main Street, Ottawa**

Tickets \$10.

Limited seating. Tickets available at NutriChem or call 613-820-4200 x1. 100% of tickets sales will be donated to the International Schizophrenia Foundation's Mindful Project, dedicated to increasing awareness about the role of diet and nutrition in children's mental health.
